

## Component Engineer

---

*Paradox Security Systems is an electronics designer and manufacturer in the alarm security industry that for 29 years produced innovative and industry-leading products. We are looking to grow our team in Canada to work on our next-generation of products.*

### **Experience you have:**

- Hands on experience in technology research, marketing research, existing solutions comparison.
- Experience in parts approvals and qualifications (electrical, mechanical, assembly and quality).
- Ability to read mechanical and electrical drawings, specifications of components.
- Ability to write detailed non-conforming reports.
- Background in electronic product development and requirements definitions is an asset.
- Interact with different departments situated internally as well as external suppliers.
- Bachelor's degree in electrical engineering.

### **What you will do:**

- Be the technical resource for the engineering department for supplier quality, components cost, new updates and releases in technological field.
- Work closely in this role with engineers to implement innovative developed technologies into the products.
- Assist the purchasing department in new component selection and qualification.

### **What you can expect:**

- Competitive salary, bonus, benefits (group insurance and RRSP contribution program).
- Modern, comfortable and clean work environment.
- Flexible schedules.
- Free parking, greater Montreal area, reverse of traffic and accessible by public network.
- Great opportunities for career growth.
- See the products come to life in our manufacturing facilities.
