

DevsOps Engineer

About Paradox

Founded in 1989, we are a privately-owned, multinational manufacturer delivering advanced security solutions to residential, industrial and government customers world-wide, via our ecosystem of exclusive distributors. Our award-winning research and development teams, in Canada and Israel, develop a full range of innovative security panels, motion detectors, interactive touch screens and security accessories which leverage ground breaking technologies. Paradox is proud of our state-of-the-art, ISO 9001:2008 certified, Canadian manufacturing facility which produces top-notch, dependable products.

At Paradox, the workplace is one of innovation, pride and excellence. We are always looking for top-notch, talented people to join our team and take advantage of the many career opportunities available in our dynamic company.

We are looking for a DevsOps Engineer for our Research & Development (R & D) department. This person will join a strong team of multidisciplinary people to develop all server-side logic, ensuring high performance and responsiveness to interface requests.

This position includes the following tasks:

- Design highly scalable servers;
- Responsible for the architecture and deployment of SQL and NoSQL databases;
- Write technical design documents;
- Monitor systems to ensure maximum up-time and quality of service;
- Develop automations for CI/CD processes;
- Develop deployment tools;
- Integration between Operations, Development and Management for deployments;
- Write appropriate unit and behavior driven tests.

Requirements:

- Bachelor's degree in Computer Science or related field/equivalent experience;
- Strong background in Linux/Unix Administration and scripting (Bash/Python);
- Knowledge of IT practices and operations in an always-up, always-available environment;
- Understanding of database technologies (MongoDB);
- Professional proven experience with AWS;
- Experience with CI/CD tools;
- Experience with configuration management like Puppet, Docker, Chef;
- Experience with Git/Gerrit/GitLab;
- Proven experience with Docker (advantage);
- Ability to work independently and efficiently;
- Attention to details while being able to see the big picture;
- "Can-do approach";
- Excellent communication skills;
- Bilingual: French and English.

Please send your CV (English and French version) to email address: humanresource2@paradox.com
