

# Embedded Linux Developer

---

## About Paradox

*Founded in 1989, we are a multinational manufacturer delivering advanced security solutions to residential, industrial and government customers world-wide, via our ecosystem of exclusive distributors. Our company develops a full range of innovative security panels, motion detectors, interactive touch screens and security accessories which leverage groundbreaking technologies. Paradox is proud of our state-of-the-art, ISO 9001:2008 certified, Canadian manufacturing facility which produces high quality, dependable products.*

*At Paradox, the workplace is one of innovation, pride and excellence. We are always looking for top-notch, talented and motivated people to join our team.*

---

We are currently seeking an Embedded Linux Developer to be part of our research and development (R&D) department. This person will join a multidisciplinary team and will contribute to the realization of future company projects.

## This position includes the following tasks:

- Design, develop, code, and debug embedded Linux systems;
- Create and implement applications in C and C++;
- Analyze and enhance efficiency, stability, and security of systems;
- Resolve bugs quickly and efficiently;
- Ensure product quality.

## Requirements:

- Bachelor's degree in Computer Science or Electrical Engineering;
- Minimum of 5 years' experience working with Linux and C++ programming;
- Knowledge with IP and communication protocols;
- Ability to meet deadlines in a fast-paced environment;
- Strong team player skills;
- Fluent in English and French (both written and spoken).
