

xBase Developer

Paradox Security Systems is an electronics designer and manufacturer in the alarm security industry that for 29 years produced innovative and industry-leading products. We are looking to grow our research & development team in Canada to work on our next-generation of products.

Experience you have:

- Strong Clipper/xBase++ language skills.
- Knowledge of Version Control Systems (Git).
- Previous experience with Agile (JIRA, Confluence).
- Knowledge of Continuous Integration Systems (Jenkins, GitLab).
- Bachelor's degree in Computer Engineering or Computer Science.

What you will do:

- Participate in activities related to the development and maintenance of company's software (analyze, conceive, program, test, troubleshoot, support).
- Manage and retrieve data from relational and non-relational databases.
- Write and edit documentation.
- Refactor and rewrite complex programs.
- Work with other developers and non-developers in an Agile development methodology on multiple projects concurrently.

What you can expect:

- Competitive salary, bonus, benefits (group insurance and RRSP contribution program).
- Modern, comfortable and clean work environment.
- Flexible schedules.
- Free parking, greater Montreal area, reverse of traffic and accessible by public network.
- Great opportunities for career growth.
- See the products come to life in our manufacturing facilities.
