

## Product Information

**Date:** *September 28, 2011*

**Product:** PCS300 Universal IP Reporting Module

**Subject:** Firmware version 2.15 released (*GSM support only*)

**Downloads:** To download the PCS300 firmware v2.15, [\\*click here](#)  
For upgrade instructions, [\\*click here](#)  
\*requires login name and password to download

**Improvements:** **GSM reporting on noisy network**

With version 2.12 of the PCS300, when the PCS300 would attempt to communicate through a noisy GSM network, the GSM channel would occasionally fail to report with the central station, resulting in a "fail to communicate" trouble. This situation has now been improved and the chances to report to the central station in a noisy GSM network are much greater.

**Contact:** If you require additional information or if you have any questions, please do not hesitate to contact our support department.
