To download the firmware upgrade instructions, [click here*](#)

**requires user login name and password to download*

New Features: **UC300 Universal Converter Support**

Enables reporting of events/alarms from any security control panel to Paradox IPR512 or IPRS7 receivers via IP and cellular network.

For more details on the UC300 features please [click here*](#)

**requires user log in to access all documents*

Support of CID SMS Languages

Resolved Issues: **Combo mode with MG/SP control panels**

When calling the control panel with a PCS250/G to arm/disarm, the PCS250/G would hang up and not send an SMS message. This has been resolved in the new firmware release.
