

## Product Information

**Date:** *March 27th, 2015*

**Product:** IP150 Internet Module

**Subject:** IP150 firmware version 1.34 release.

**Downloads:** To go to the IP150 download page, [click here\\*](#)

*\*requires user login name and password to download*

**Resolved Issues:** **Missing IP module.**

When ending a connection that was made to a panel through iParadox, the panel would generate a “missing IP module” event. This has now been corrected with the release of version 1.34.

**Timeout communication with iParadox**

When trying to connect to MG/SP panels through iParadox, there were instances where the connection was not established and then displayed a “timeout communication” message. This has now been corrected with the release of version 1.34.

**Contact:** If you require any additional information or if you have any questions, please do not hesitate to contact our Distributor support department.
