

K07C: Grafica Keypad V1.0

What's New

Firmware:
Version 1.0

Compatibility:

- Imperial V32 Main Controller
- EVO48/192
- DGP-NE96
- DGP-848

NOTE: Imperial systems require BabyWare V1.0.300 or higher. EVO/DGP systems require WinLoad V5.0 or higher.

The Grafica K07C is an updated full-color version of the Grafica K07. The following are new features and options for the K07C. They may not be included in any manuals, therefore use this information in conjunction with your existing Grafica documentation.

Color Screen

The K07C includes a 9cm (3.5") color LCD screen. Users can customize the display by choosing their own text, selected text, and background colors.

Color LCD screen specifications:

Screen size: 9cm (3.5")
Screen resolution: 320x240
Colors: 64K colors

Screensaver

The K07C features a full-color screensaver that will cycle through images when the keypad is not in use.

- Up to 512 images can be saved on a standard SD memory card (not included)
- If no card is inserted into the SD card slot, the keypad will display default sample images
- In order for images to be correctly displayed, they must conform to the following:
 - .bmp format
 - resized to 320x240 pixels
 - limited to 24-bit color

For instructions on formatting images to be used with the screensaver, refer to the K07C Quick Start.

SD Memory Card

An SD memory card slot has been added for use with the screensaver.

- SD card max. 2GB (SDHC cards not supported)
- SD card must be formatted in FAT16
- Files must be stored in the card's root directory (not in folders)
